

# CT Field Service

**Are you tired of solutions to repeated failures that don't ultimately fix your problem?**

**Have your CT volumes dropped and now need a cost-effective alternative for service?**

**Does your service engineer quickly install and calibrate your tube to OEM specifications?**

**Does your service provider utilize FDA-compliant parts?**

Consensys Imaging Service specializes in FDA-compliant diagnostic imaging equipment service nationwide. Our quality management system is certified to both ISO 9001:2008 and ISO 13485:2003 (medical device specific) international quality standards. We deliver world-class equipment relocation, emergency repair, FirstLook™ training for your in-house engineer and full-service maintenance solutions through our team of local Consensys Certified™ Field Service Engineers. With our robust Radiation Safety and proprietary Power Quality programs, you can rest easy knowing that your CT Scanner meets all local, state and other regulatory requirements. By partnering with some of the Top 100 Hospitals, we've become an attractive alternative to OEM service.
