

Digital Mammography Field Service

Is your service provider helping you pass weekly/monthly QC checks?

How about annual physicist inspections?

Are False-positives increasing as your equipment's age increases?

Is your service provider helping make your patients happy?

Do they contribute to patient comfort and swift screenings?

Do you have an alternative to OEM service?

Consensys Imaging Service specializes in FDA-compliant and ACR certified diagnostic imaging equipment service nationwide. Our quality management system is certified to both ISO 9001:2008 and ISO 13485:2003 (medical device specific) international quality standards. We deliver world-class equipment relocation, emergency repair, FirstLook™ training for your in-house engineer and full-service maintenance solutions through our team of local Consensys Certified™ Field Service Engineers. With a robust Radiation Safety program and a long history of using our proprietary service tools to remotely diagnose and service Digital Mammography units, we're an attractive alternative to OEM service.
