

Ultrasound Field Service

Is your service engineer formally trained on the specific machines you have or just ultrasound in-general?

Does your service provider use FDA-compliant parts?

Is your service provider capable of testing your system's probes to ensure the proper diagnosis or to ensure the best image quality possible?

Have you been told "cannot be repaired buy a new one"?

Consensys Imaging Service specializes in FDA-compliant and ACR certified diagnostic imaging equipment service nationwide. Our quality management system is certified to both ISO 9001:2008 and ISO 13485:2003 (medical device specific) international quality standards. We deliver world-class emergency repair, Consensys Certified™ FirstLook™ training for your in-house engineer and full-service maintenance solutions through our team of local Field Service Engineers. With a vast array of proprietary intellectual property and service tools, including system access and the patented FirstCall™ probe testing device, we deliver world-class service on your ultrasound medical devices.
